

# Seamless Unified Commerce with Enactor on Demand.

Cloud-Powered | Total Control

# Unified Commerce Platform

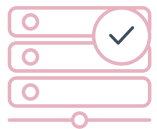

## Transforming Retail: Enactor's Unified Approach for a Seamless Customer Journey

If you're a retailer, you have hundreds or thousands of stores and rely on technology to give the business what it needs. In addition, are you under pressure to deliver on the customer experience.

### Achieve Seamless Customer Journeys:

Craft seamless omnichannel customer journeys, ensuring a cohesive and enjoyable experience across all touchpoints.

### Accomplish a Centralized Integrated System:

Seamlessly integrate diverse systems, operational efficiency, and cohesion under one Unified platform.

### Execute Improved Processes:

Enabling new processes and in-store flows that enhance customer engagement and operational efficiency across multiple channels and applications.

### Optimized Cost Structure:

Reduces the expenses associated with managing separate systems for each channel.

Enactor's unique architecture which acts as a single platform centrally to ease all day-to-day retail system operations and facilitates retailers to offer consistent and personalized experiences.

## Platform Flexibility and Extensions

Highly configurable and API-driven, it's pluggable into any Web App or API in your digital landscape.

## Application Features and Control

Powered by the Enactor platform, our omni-channel POS can run on any device, mobile, fixed or HHT, Windows, Android, Linux, or iOS. You also get the control over the application's flow, UIs, menu structure, privileges, and authorisations.
